DVD GUARD • Amazing Clear Plastic Shield! • Reversible for Slim DVD Players too! Length: 1

Please Note: Be sure to read all information on this package. With or without this product, equipment and wall unit safety is a serious subject which requires your attention!

DVD Guard® is a deterrent device designed to provide parental convenience and to protect electronic equipment. DVD Guard® is not intended as a replacement for child supervision.

Instructions: Look at diagrams below which explain simple use. DVD Guard covers entire front panel and removes easily for changing discs. Read directions ahead before affixing fasteners!

Step 1 -- Determine which panel will be used as top and attach fasteners to inside of DVD Guard by removing liner and applying distributed pressure for 40 seconds to allow tape to adhere. See "Step 1" diagram.

Step 2 -- Now that fasteners are secured to DVD Guard, remove remaining liners and affix DVD Guard to top of DVD player, so that the guard closely covers controls. Press down firmly for 40 seconds. Leave DVD Guard in place and use remote! To change discs, simply remove and reattach guard as needed. See "Step 2" diagram.
